your sizing scale

Vest

Bust measurement: _____ cm
For all pattern parts above the waist.

Measure the fullest part of the bust.

Hip measurement: _____ cm
For all pattern parts below the waist.

Measure the widest part of the hip.

- 1 Spread out pattern paper. Scotch tape the yellow miniature pattern onto the paper. Find your bust or hip measurement on the sizing scale.
- 2 Push pin through the corresponding line on the scale. Carefully push the pin and scale into the center cross point of the pattern.

- 3 Align the edge of the sizing scale to any selected line extending from the pattern. Extend the measuring tape, match the centimeter number of the pattern, and draw a dot. Once all lines are extended, all dots are joined with the curved ruler.

Check pattern for correct fit before cutting the material!
Don't forget to add seam allowance to all pattern!
